# Transparent LED

The Transparent LED Poster is designed for maximum transparency and high resolution. It is a perfect fit for high impact retail stores, flagships, shopping malls, and other premium locations. These eye-catching installations are mainly used for window fronts, sliding doors, wall partitions and other market verticals.

A Screen for Every Scene

> Brightness for low light to full daylight settings
> Transparency from 60% to 90%
> A variety of sizes from 32" x 19" and up
> Pixel spacing from 2.6mm for close viewing to 15.6mm for projecting across wide distances
> Full size plug-n-play screens or modular panels for custom builds in a variety of shapes
> Display any combination of text, images and video to suit your needs
